

Claim

What I claim as my invention is the idea of having a mobile cellular telephone alarm system connected to the car. I claim that the idea of the mobile cellular phone will alert the owner of the car via images, sounds and calls in the cellular unit and this product is known as the Mobile Telephone Alarm System, Cellular Alarm for cars. I claim that the car alarm system will have no apparent sound but the connection to the mobile telephone unit will alert the mobile telephone owner of the attempts to break into his car.
